(Module 2)
Practical – IV

Roll No.: T009	Name: Siddhesh Kamble
Class:TYIT	Batch:1
Date of Assignment: 09/09/2026	Date/Time of Submission: 09/09/2026

Practical 4-A: Create Issues Under an Epic

Objective

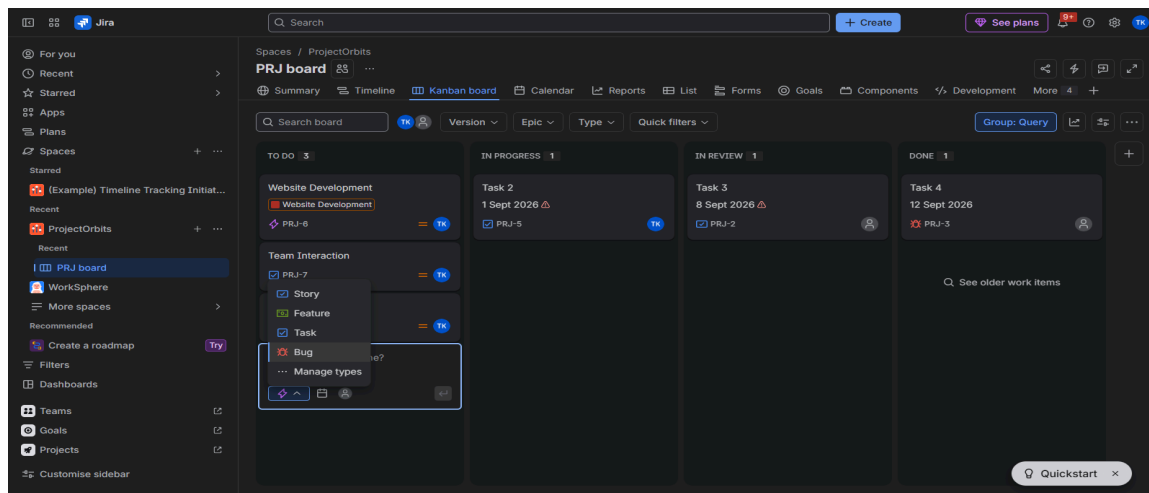

To create and organize issues under an Epic in Jira.

Theory

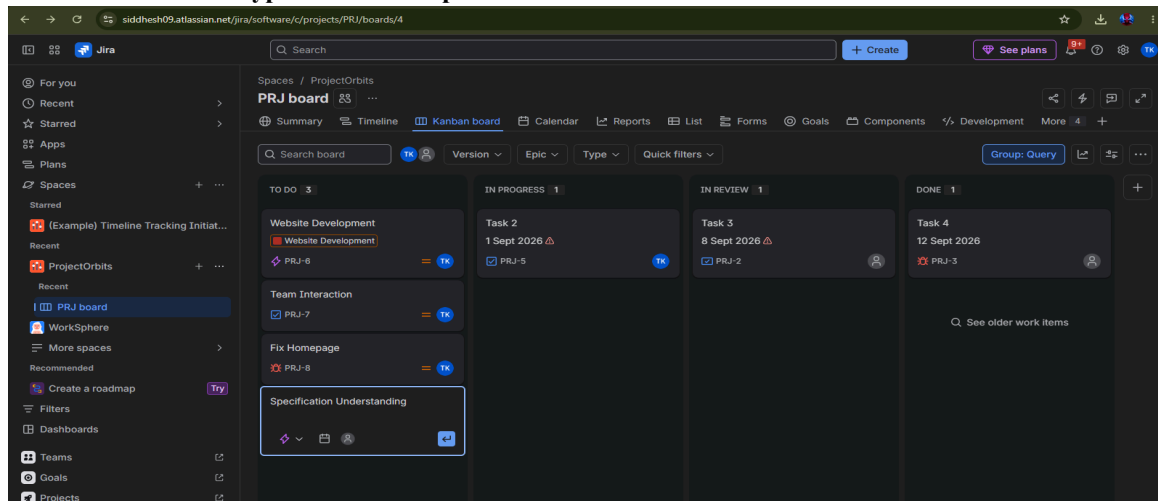

An **Epic** is used to group related work items under a common goal. Issues can be created and organized under an Epic to make project work easier to manage and track.

Steps

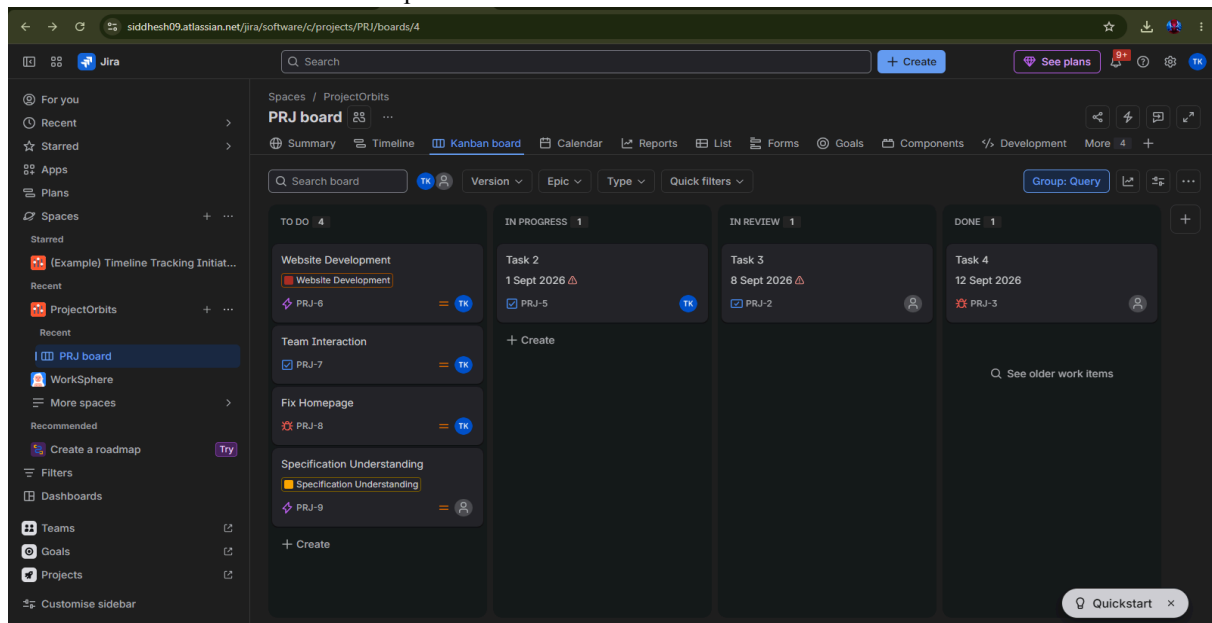

1. Go to **Issue Management**.
2. Click **Create issue**.

3. Select **Issue Type** and choose **Epic**.

- Enter the required details.
- Press **Enter** to finalize the Epic.

Result

The Epic was successfully created in Jira for organizing related issues.

Practical 4-B: Assign Issues to Users and Set Priority & Due Date

Objective

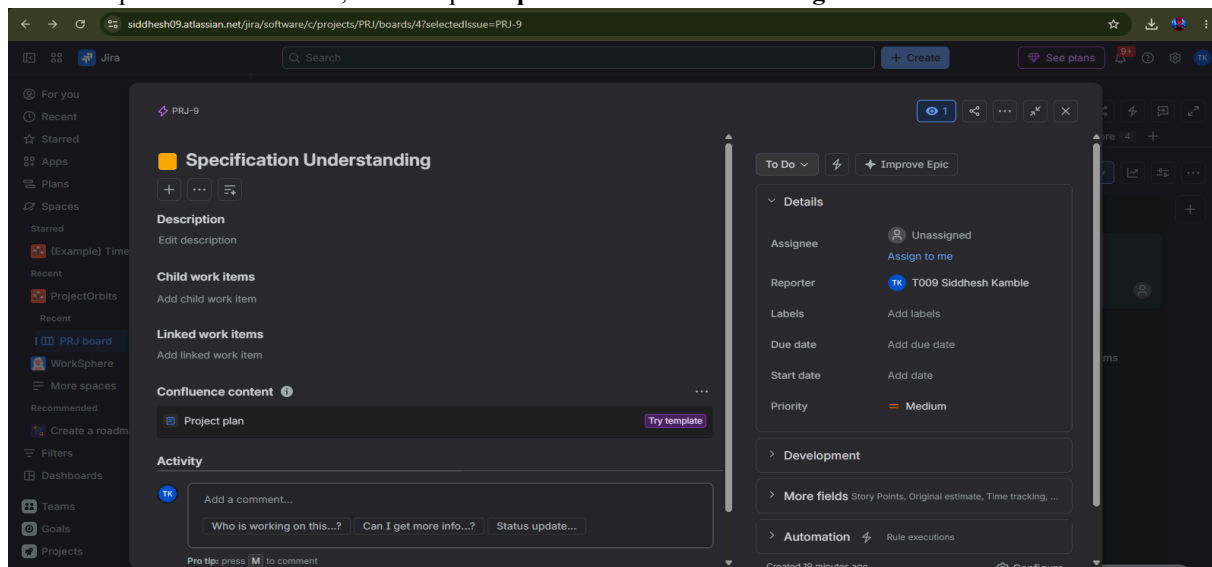

To assign open issues to team members, set their priority level, and establish deadlines.

Theory

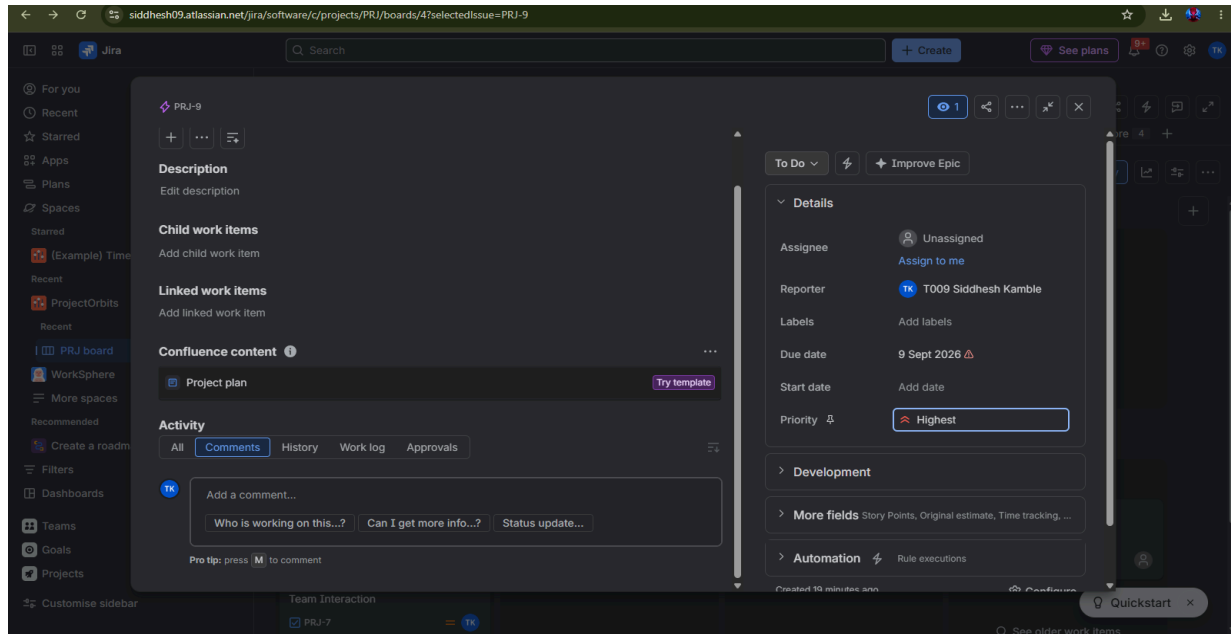

After creating an issue, it can be assigned to a specific team member. **Priority** helps identify the importance of the issue, while the **Due Date** defines the expected completion deadline.

Steps

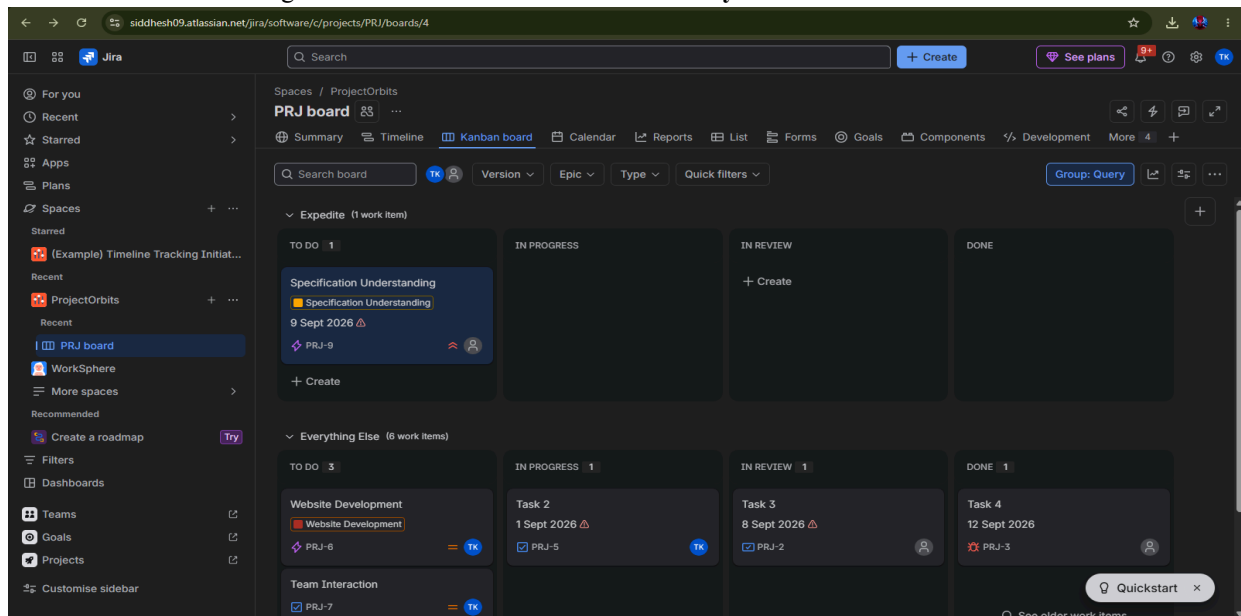

- Open the created issue, for example “**Specification Understanding**”.

- Assign the issue to the required user.
- Set the **Priority** level.
- Set the **Due Date**.

5. Click X and navigate to the **Dashboard / Board Summary** to check the issue.

Result

The issue was successfully assigned to a user with the required priority and due date.

Conclusion

Issues were successfully created and organized under an Epic. The issues were also assigned to users and configured with appropriate priority levels and due dates for effective project management.
